

Location, Location, Location.

Is the common Real Estate phrase actually useful?

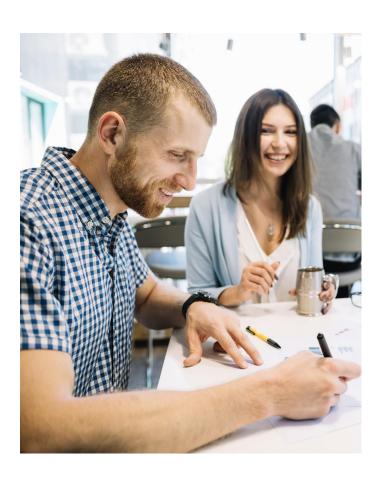

Who's here?

I am Andres, Data Scientist.

You are the Iowa Council for Attracting Remote Workers.

Outline

- The Problem
- The Data
- The Results

O1 The Problem

Is Location the most important factor in predicting House prices?

O2 The Data

Ames Housing Data

Neighborhoods Ranked by Price

Top 5:

1. Stone Brook

2. Northridge Heights

3. Northridge

4. Green Hills

5. Veenker

Bottom 5:

1. Meadow Village
2. Iowa DOT and Rail Road

3. Briardale

4. Old Town

5. Brookside

Other Location Proxies

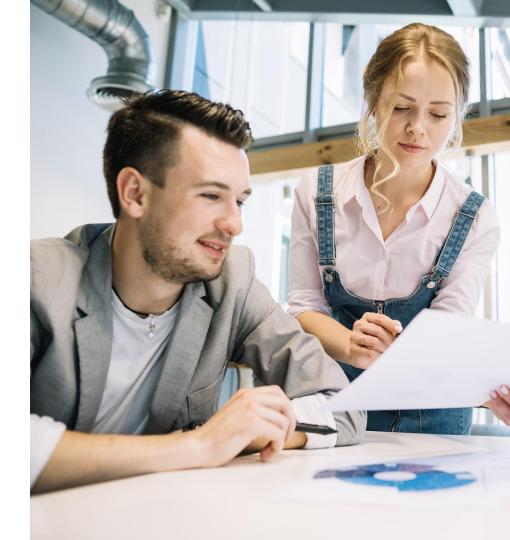

Lot Shape

Regular, Slightly irregular, Moderately Irregular, Irregular Lot Configuration

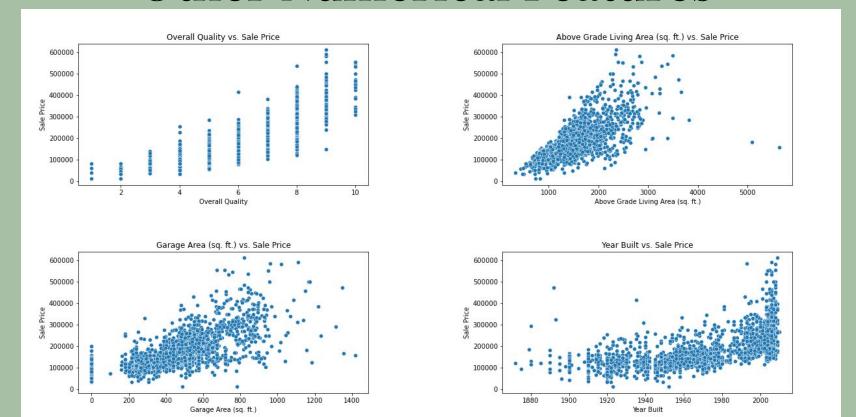

Inside lot, Corner lot, Cul-de-sac, Frontage on 2 sides of property, Frontage on 3 sides of property Proximity

Adjacent to arterial street, feeder street. Within 200' of North-South Railroad, near positive off-site feature: park, greenbelt, etc.

Is there any additional data?

Other Numerical Features

O3 The Results

Don't get tunnel vision! Look at more factors!

	R2	RMSE
Null Model	-	79,276.56
LinReg Numericals	77.44%	37,279.67
Neighborhoods Only	59.86%	49,726.20
Location Proxies	62.63%	47,982.08
Best Model (Ridge)	87.04%	28,258.67

Thanks! Questions?
